

## *eFront Case Study1: Telenor Norway*

When planning the release of their latest business efficiency system Mobilt Bedriftsnett, Telenor committed to an even higher standard of customer support. An integral link of this effort was to launch a learning portal that would allow users to gain a better insight and a higher competence in the use of the possibilities offered by Mobilt Bedriftsnett. This is provided by Telenor's new, comprehensive e-learning portal delivered by New Learning As.

Telenor's e-learning portal is hosted by the Norwegian e-learning company New Learning which also delivers all content, and powered by eFront's LMS platform. This project takes advantage of eFront's wide technological support, great customization possibilities and advanced tracking and reporting tools. Courses delivered in the portal take full advantage of multimedia learning, and use sound, video, animations and interactivity.

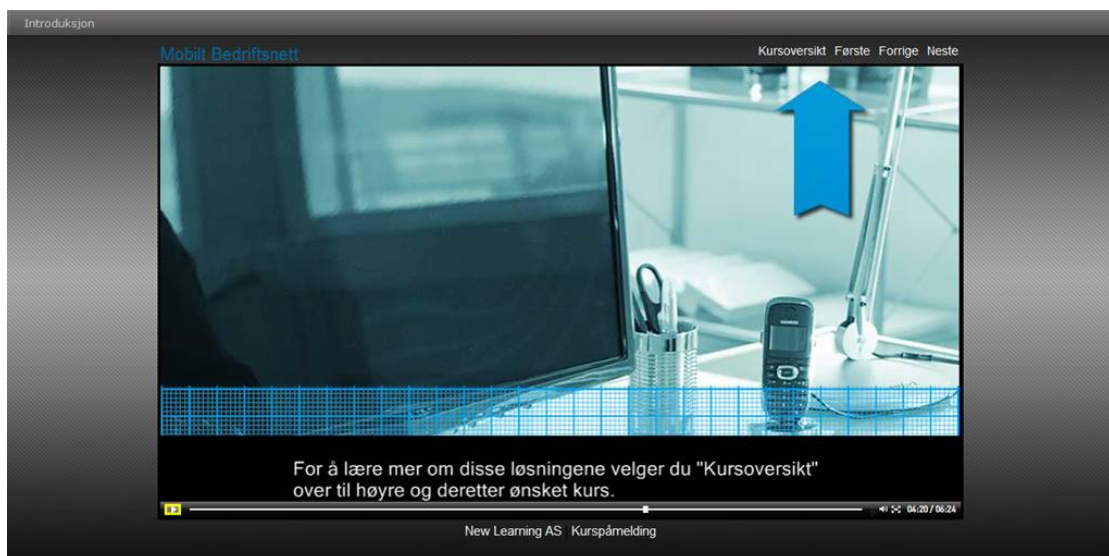

This learning platform will be the premier learning site for Telenors mobile services in Norway, and will most likely service in excess of 100,000 users, from several thousand companies nationwide. The LMS is adapted for Telenor's needs by giving it a brand new interface, in keeping with Telenor's visual profile, as well as a Single Sign-On solution.
